FYI – it appears that we're ok for now.

Thanks

Subject: RE: Silverton Soil Sampling Proposal

Keep in mind that the objective of this fact sheet is very different from the initial fact sheets which provided general information applicable to most mining and smelting sites. We are trying to convince the town board that limited sampling would be useful for identifying whether or not lead (which is the most likely contaminant here) is elevated in Silverton. If so, then we would hopefully progress to a more generalized approach.

Subject: Silverton Soil Sampling Proposal

Good Morning,

Attached are the proposal for the Town Board describing the potential sampling in Silverton and figures. I made a couple edits the last version that Joyel provided after she received comments from the larger group.

This needs to go to the Town today as requested by Mayor Tookey. If this is good to go and you want to send this, Martin, let me know. If you want me to send this let us know. If you have changes to this please coordinate with Joyel; I am off today but at home.

See you guys tomorrow.

Thanks,

Steve
